~V5BT PRO~

The bot trades on under 8 prediction,after one loss it switches to trade under 3 prediction.in case of a second loss it will switch back to trading with under 8.
Make sure you do your under 8 and under 3 analysis well on the Dtrader digit analyzer.
:Digit 8 & 9 should be below 10%
:Digit 0,1 & 2 above 10.5% and above
This increases the chances of recovery incase of a loss
 All THE BEST....@SÃVÀGÉ
